GRADUATE STATISTICS
The College surveys recent graduates to determine the subsequent education and employment success of alumni, together with their opinions about whether the quality of their Finger Lakes Community College education contributed to this success. Responses from the most recent surveys of graduates one year after graduation indicate that 99 percent of graduates with transfer degrees (A.A. and A.S. degrees) continued their education or found employment immediately after completing study at the College. Approximately two-thirds of graduates were attending college and one-third were employed. Results from the same surveys indicate that 90 percent of graduates with career degrees (A.A.S. degrees) continued education or found employment immediately after graduation. Of the remaining 10 percent, half were seeking employment and half were not. Slightly more than half of Finger Lakes Community College students who continue their education attend SUNY four-year colleges or universities.

Five years ago, the State University of New York introduced the SUNY Alumni Outcomes Survey to examine the perceptions of alumni about the quality of educational experiences at SUNY institutions. The survey was administered to a sample of Finger Lakes Community College alumni who had graduated in 1991 and 1994 to determine perceptions five years and eight years after graduation from the College. In that survey 99 percent of Finger Lakes Community College alumni reported that they would recommend the College to a friend. The survey also revealed nearly unanimous agreement among the alumni about the highly supportive academic and interpersonal interactions among students, faculty, and staff. Finger Lakes Community College alumni rated the College in top five among all SUNY community colleges on several dimensions including: opportunities for student/faculty interactions, faculty respect for students as people, and the strength of friendships developed among students. Finger Lakes Community College alumni also rated the College in the top five for its response to older and nontraditional students, and second overall for internships, cooperative work/study, and field experiences.

DEGREES AWARDED
Finger Lakes Community College is authorized by the Board of Regents of the University of the State of New York to grant the following degrees and certificates:

**Associate in Arts**
Liberal Arts and Sciences

**Associate in Science**
Liberal Arts and Sciences
Biotechnology
Business—Business Administration
Communications
Computer Science
Engineering Science
Environmental Studies
Fine Arts
Human Services
Information Systems
Music
Music Recording Technology
Physical Education Studies
Sports and Tourism Studies
Theatre Arts
Associate in Applied Science
